

Dr. Deblinger
& staff,

After recently visiting you as a patient for endodontic work, I felt it necessary to write a note of thanks. Being in the health profession myself, I have delivered patient care, and also observed the type of care delivered by other so called professionals.

It is difficult to express in words the warmth that I felt when I entered your office. Your compassion and understanding, as well as your staff's, show that you have succeeded in treating the patient as a whole person, not just another statistic.

Thank you for taking a situation that could have been very difficult for me and making it as pleasant as possible.

Sincerely,
Virginia
